AutoWish App Design Brief for Moda

Oct 16, 2026 · @SARA

How to use this brief in Moda

This brief describes every AutoWish screen, the full user flow and all 9 animations, so Moda can design them in one consistent style.

1. Set up the AutoWish brand kit in Moda first, using the Brand kit section below.
2. Export this doc as PDF and attach it with Moda's attachment button, or paste one prompt from the last section into the prompt bar.
3. Make one design per prompt (screens, flow, animation storyboard), not everything at once. Smaller requests come out cleaner.
4. Fix details in Moda's chat panel, for example "use the gift icon on the splash screen".

Moda makes the screens as mockups and the flow as a diagram. It cannot play the real Lottie animations or build a working app; those live in the React Native code and the 10 animation files.

App overview

AutoWish reminds you of your loved ones' special dates and sends your pre-written wish on WhatsApp at the right time, even when you're busy.

- **Platform:** mobile app, React Native (Android first, iPhone with tap-to-send)
- **Users:** busy young adults and working people who don't want to miss a friend's, family member's or colleague's special day
- **Occasions:** birthdays, anniversaries, Mother's Day, Father's Day and other important dates
- **Relationships:** Friend, Family, Colleague
- **Core idea:** get a reminder before the day; if you'll be busy, write the wish now and AutoWish sends it at 12:00 AM (or a time you pick)
- **Tagline:** Never miss a special day
- **Mood:** warm, playful, soft and celebratory, like a pastel party, but clean and easy to use with one hand

Brand kit

Use exactly these colours, fonts and shapes on every screen so the app, its animations and its marketing all match.

Logo: a flat pastel gift box (coral pink box, light pink lid, soft blue ribbon and bow) with a white chat bubble holding a coral heart. Wordmark "AutoWish": "Auto" in dark navy, "Wish" in deeper coral, bubbly rounded font. App icon = the gift alone on a full warm off-white square.

Colour	Hex	Used for
Warm off-white	#F6F5F2	App background
White	#FFFFFF	Cards, sheets, chat bubble
Dark navy	#2F3550	Main text, gift face
Grey-blue	#5D6585	Secondary text
Soft pink	#FFB4B4	Gift lid, Today card
Light pink	#FDE3E4	Glows, soft fills
Coral	#F9A39C	Gift box
Heart coral	#EF7A70	Heart, success circle
Deeper coral	#E0645A	"Wish" in the wordmark
Blue	#789BD9	Ribbon knot, Sent tick, selected chips
Light blue	#A9C1E6	Ribbon, dotted trails
Blue mist	#DAE3EA	Chips, Scheduled pill, calendar
Orange	#FFA618	Main buttons, countdown badges
Yellow	#FFD961	Today chip, confetti
Sparkle gold	#F2C94C	Sparkles
Soft outline	#E6DFD3	Borders, bubble outline

Fonts: Fredoka (headings, app name, bold and rounded) and Nunito (body text and buttons).

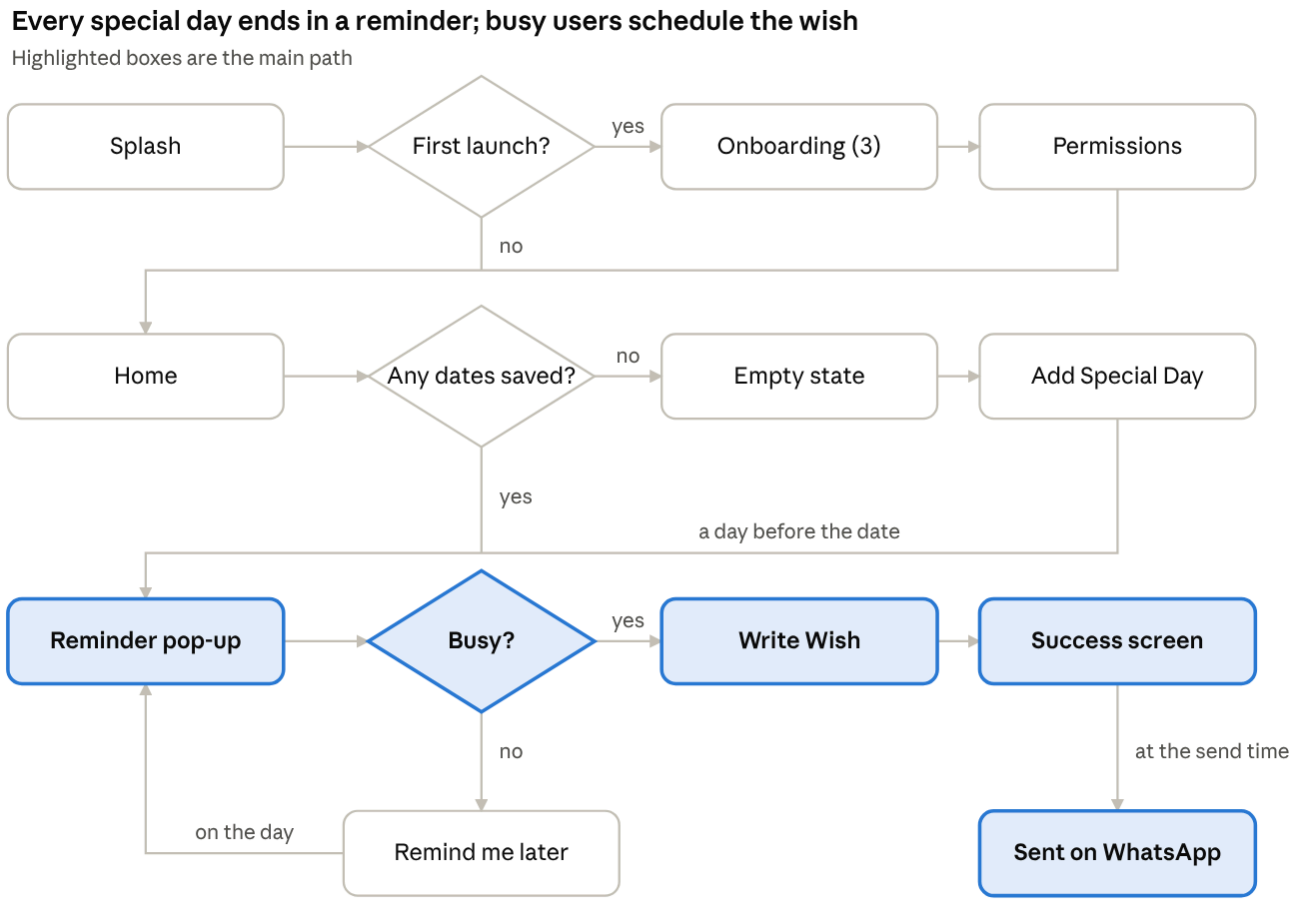

Shape and style rules:

- Rounded corners: 20 to 24 px on cards, 28 px on sheets, full pill shape on buttons and chips

- Flat pastel illustrations, no outlines, no gradients, very soft shadows only
- Main button: orange pill, dark navy text, at least 52 px tall
- Text on pink or orange is always dark navy, never white
- Icons: simple rounded line icons, never emoji
- Status colours: Scheduled = blue mist pill, Sent = blue tick, Failed = soft red with Retry

User flow

Every saved date leads to a reminder a day before; if the user is busy, they write the wish and AutoWish sends it at the chosen time.

AutoWish user flow · main screens, 3 decisions

First-time users go through onboarding and permissions; returning users land on Home. "Remind me later" brings the reminder back on the day itself.

Screens

AutoWish has 13 screens. Each one lists its content top to bottom and the animation it uses (numbers match the Animations section). All are mobile, 390 × 844, on the warm off-white background.

1. Splash

- Centre: the gift box, which opens and lets the heart bubble float out (Animation 1)
- Below: "AutoWish" wordmark and the tagline "Never miss a special day"
- Goes to Onboarding on first launch, Home after that

2–4. Onboarding (3 screens)

- Top: "Skip" text button
- Centre: a looping illustration (Animation 2)
- Title and one line of text:
  1. "Never forget a special day" · Birthdays, anniversaries, Mother's Day and Father's Day in one place.
  2. "Busy? Write your wish in advance" · Write it whenever you have a minute and pick when it goes out.
  3. "We send it on WhatsApp" · Your wish is delivered right on time, even if you're busy.
- Bottom: page dots (active dot is a coral pill) and an orange "Next" button; the last screen says "Get started"

5. Permissions setup

- Title: "Let's set up AutoWish"
- Three cards with a toggle or "Allow" button each: Notifications (to remind you), Contacts (to import birthdays), WhatsApp auto-send (Android only, uses Accessibility)
- Short tip under WhatsApp auto-send: "Turn off battery optimisation so wishes send on time"
- Orange "Continue" button, text button "I'll do this later"

6. Home

- Greeting: "Hi Ali" with a profile photo on the right
- Today card (soft pink): small wiggling gift (Animation 3), yellow "TODAY" chip, "Ahmed's birthday", "Wish scheduled for 12:00 AM"

- "Upcoming" list of white cards: photo, name, occasion · relationship chip (Friend / Family / Colleague in blue mist), orange countdown badge ("3 days")
- Example rows: Ammi and Abbu · Anniversary · Family · 3 days; Sara · Birthday · Friend · 9 days; Abbu · Father's Day · Family · 21 days
- Floating orange "+" button bottom right; bottom tab bar: Home, Wishes, Settings
- Cards slide in one by one (Animation 9)

7. Home, empty

- Sleepy gift with closed eyes and floating z's (Animation 8)
- "No special days yet" · "Add your first special day and we'll remind you before it comes."
- Orange "+ Add your first special day" button and a blue text button "Import birthdays from contacts"

8. Add Special Day

- Photo picker circle at the top
- Fields: Name, WhatsApp number (+92), Occasion (Birthday, Anniversary, Mother's Day, Father's Day, Other), Date picker
- Relationship chips: Friend, Family, Colleague
- "Remind me" chips: 1 day, 3 days, 1 week before
- Orange "Save" button

9. Reminder pop-up (bottom sheet)

- Sheet slides up over the Home screen with a dark navy scrim at 35%
- Gift drops in, bounces and peeks open (Animation 4)
- "Ahmed's birthday is tomorrow!" · "Busy? Schedule your wish now."
- Orange "Write Wish" button, grey text button "Remind me later"

10. Write Wish

- Title "Wish for Ahmed"
- Message box with the wish text, and a "Suggest a wish" button with a small sparkle icon
- Tone chips: Funny, Emotional, Formal, Urdu
- Send time row: "Send on WhatsApp · 17 Oct · 12:00 AM"
- Preview area: the message shown as a WhatsApp-style chat bubble
- Orange "Schedule Wish" button; on tap the bubble flies away like a paper plane (Animation 5)

11. Success

- Coral circle, checkmark and confetti (Animation 6)
- "Wish scheduled!" · "We'll send it to Ahmed on WhatsApp at 12:00 AM, 17 Oct."
- Orange "Back to Home" button, text button "View scheduled wishes"

12. Scheduled Wishes

- Title "Scheduled Wishes", filter chips: All, Scheduled, Sent, Failed
- Rows: photo, name, occasion · date and time, status on the right
- Status: Scheduled = blue mist pill; Sent = blue tick that pops in (Animation 7); Failed = soft red pill with "Retry"

13. Settings

- WhatsApp auto-send toggle with status ("On" / "Needs permission")
- Battery optimisation tip card
- Default send time (12:00 AM), default reminder (1 day before)
- Notification preferences, import from contacts, privacy

Animations

All 9 animations use the same gift, chat bubble, heart, sparkles and confetti, and the same soft bounce curve (0.34, 1.56, 0.64, 1). In Moda, show each one as a short storyboard of 3 to 4 frames.

#	Where	What happens	Length	File
1	Splash	Gift scales in and squashes, the lid pops open and tilts, the heart bubble floats up, confetti bursts and falls, two sparkles twinkle	2.5 s, once	autowish_splash.json

#	Where	What happens	Length	File
2	Onboarding	Calendar: a ring draws around a date and a heart pops on it. Write: three typing dots turn into a pulsing heart beside a ticking clock. Send: the heart bubble flies along a dotted trail into a phone, which shows a notification dot	3 s loops, one per screen	autowish_onboarding_1_calendar.json, _2_write.json, _3_send.json
3	Home, Today card	Gift wiggles left and right twice, then rests; a soft pink glow breathes behind it; small sparkles twinkle	3 s loop	autowish_today_gift.json
4	Reminder pop-up	Gift drops in, bounces high then low, settles; the lid lifts and the heart bubble peeks out; two confetti pieces pop	1.3 s, once	autowish_reminder_gift.json

#	Where	What happens	Length	File
5	Schedule Wish button	Bubble winds up, launches up and right like a paper plane with a dotted blue trail, vanishes in a sparkle	1.5 s, once	autowish_schedule_plane.json
6	Success	Coral circle springs in, white check draws itself, confetti bursts in all directions and falls, sparkles stay	2 s, once	autowish_success.json
7	Scheduled Wishes, Sent	Blue circle pops in, white check draws, three yellow sparkles burst out	0.8 s, once	autowish_wish_sent.json
8	Home, empty	Gift naps with closed eyes and a smile, breathes, blue z's float up; once a loop it peeks with one eye	4 s loop	autowish_empty_state.json
9	Everywhere	Cards slide up 24 px and fade in, 0.1 s apart; buttons shrink to 95% on press and spring back	0.45 s per card	Code: SlideInCard, BounceButton

If someone turns on "reduce motion" on their phone, the animations rest on a still frame and cards appear without sliding.

Moda prompts

Paste these one at a time, with the AutoWish brand kit selected and this doc attached as PDF.

Prompt 1: onboarding screens (format: Slides or Carousel)

```
Design the first 5 mobile screens (390 x 844) of AutoWish, a pastel birthday and special-days reminder app that sends pre-written wishes on WhatsApp. Follow the attached brief exactly: brand colours, Fredoka and Nunito fonts, rounded corners, orange pill buttons with dark navy text. Screens: 1) Splash with the gift logo, wordmark and tagline "Never miss a special day" 2-4) the three onboarding screens with their titles, text, page dots and Next button 5) Permissions setup. Show each screen on its own phone frame, side by side.
```

Prompt 2: main screens

```
Using the same AutoWish style as before, design these mobile screens (390 x 844) from the attached brief: 6) Home with the pink Today card and the Upcoming list 7) Home empty state with the sleepy gift 8) Add Special Day form 9) Reminder bottom sheet over the Home screen. Use the exact text and example names from the brief. One phone frame per screen.
```

Prompt 3: wish screens

```
Using the same AutoWish style, design these mobile screens (390 x 844) from the attached brief: 10) Write Wish with tone chips, send time and WhatsApp-style preview 11) Success screen with the coral check circle and confetti 12) Scheduled Wishes list with Scheduled, Sent and Failed statuses 13) Settings. One phone frame per screen.
```

Prompt 4: user flow diagram (format: Document or Slides)

```
Create a clean user flow diagram for the AutoWish app using the attached brief's User flow section. Boxes for each screen, arrows for each step, diamonds for the decisions (first launch? any dates saved? busy?). Pastel brand colours, rounded boxes, Fredoka labels. Highlight the main path: Reminder, Write Wish, Schedule, Success, Sent.
```

Prompt 5: animation storyboard (format: Slides)

Create a 9-slide animation storyboard for the AutoWish app from the attached brief's Animations table. One slide per animation: title, where it appears, and 3 to 4 frames in a row showing the motion step by step, with a one-line caption under each frame and the length in seconds. Use the same gift box, white chat bubble with a coral heart, sparkles and pastel confetti in every slide.
